An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gerald on Hespos.

The application has been amended as follows:

In claim 11, lines 1-2, replace "Use of the method according to claim 1, for" with:--  
The method according to claim 1, of--.

In the Abstract: delete the last line reading "Unique Figure"

At page 1, line 5 of the instant specification insert:--This application is a national stage entry under section 371 of PCT/FR2003/02592, filed 27 August 2003.--

The following is an examiner's statement of reasons for allowance: US 6475390 embodies the closest prior art teaching ion exchange followed by nanofiltration and ion *exclusion*. The patent fails to teach or suggest ion exchange after the nanofiltration step and/or regeneration of the ion exchange resins with an inorganic acid of which the anion is of the same type as the monovalent anions and with an inorganic base of which the cation is of the same type as the monovalent metal cations present in the initial aqueous solution to obtain the improved demineralization, energy savings, chemical savings and limitation of effluent streams demonstrated by the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
